

- 1) 3 litres 600ml, 4 litres 800ml, 8 litres 400ml
- 2) 20 jars

- 1) 4100ml - Incorrect
4750ml - Correct
4700ml - Incorrect
4350ml - Incorrect

Accept any correct explanation that shows that Winifred is incorrect, such as Winifred is incorrect because bottle 3 has a total volume of 4700ml which is 50ml less than the label shows.

- 2) Accept any correct combinations of two ingredients that total 2 litres. For example, one bottle of dragon blood and one bottle of slug slime, or one bottle of nettle soup and fifteen bottles of briny broth.

- 1) briny broth, dawn dew, essence of nightshade, nettle soup = 1 litre 250ml
- 2) snake oil, teachers' tears, dragon blood, slug slime = 5 litres 750ml
- 3) Wilson would use two bottles of briny broth and two bottles dawn dew giving a total volume of 700ml. Wenda would use two bottles of snake oil and two bottles teachers' tears giving a total volume of 7 litres 500ml.
- 4) Accept any correct combinations that use 4l of snake oil and then two ingredients totalling a whole number of litres. For example, one bottle of dragon blood and one bottle of slug slime or two bottles of nettle soup.
